LONDON 1948

BERLIN 1936

LOS ANGELES 1932

THE value of 'Ovaltine' in the training of athletes is known the world over. 'Ovaltine' helps to build the physical fitness required of athletes, and to supply the stamina and endurance needed in vigorous games and sports. Delicious 'Ovaltine' provides important nutritive elements which greatly assist in reinforcing strength and energy and in building up body, brain and nerves.

At the recent Olympic games in London, 'Ovaltine' was regularly served to the athletes of the competing countries both before and after participating in their events. Taken again at bedtime, 'Ovaltine' aided the much needed relaxation which helped to ensure refreshing and restorative sleep. For these reasons 'Ovaltine' is equally valuable as the daytime and bedtime beverage for everyone, in all walks of life.

## A SPLIT SECOND IN ETERNITY

### The Ancients called it COSMIC CONSCIOUSNESS

Must man die to release his *inner consciousness*? Can we experience *momentary flights* of the soul—that is, become *one with the universe* and receive an influx of great understanding?

The shackles of the body—its earthly limitations—can be thrown off and *man's mind can be attuned* to the Infinite Wisdom for a flash of a second. During this brief interval intuitive knowledge, great inspiration, and a new vision of our life's mission are had. Some call this great experience a psychic phenomenon. But the ancients knew it and taught it as *Cosmic Consciousness*—the merging of man's mind with the Universal Intelligence.

#### Let This Free Book Explain

This is *not* a religious doctrine, but the application of *simple, natural laws*, which give man an insight into the great Cosmic plan. They make possible a source of great joy, strength, and a regeneration of man's personal powers. Write to the Rosicrucians, an age-old brotherhood of understanding, for a *free copy* of the book "The Mastery of Life." It will tell you how, in the privacy of your own home, you may indulge in these mysteries of life known to the ancients.
